Professional Summary

Full stack developer with 2.5 years of professional experience building web applications and cloud-based solutions. Recent Master of Information Technology graduate from Monash University and winner of Best Project at the Monash PG Industry Experience Expo for Hikewise, a geospatial bushfire-recovery platform. Works mainly with the MERN stack, Next.js and WebAR, and has delivered production software across healthcare, e-commerce, and environmental projects. Uses AI-assisted development tools daily to ship faster while keeping full ownership of the code.

Skills

- **Languages:** JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
- **Frontend:** React.js, Next.js, Vue.js, Tailwind CSS, Vite, Bootstrap
- **Backend:** Node.js, Express.js, Django, RESTful APIs
- **Databases:** PostgreSQL / PostGIS, MongoDB, MySQL, Redis, Firestore
- **Cloud and DevOps:** AWS (EC2, S3, Lambda, DynamoDB, Cognito), Docker, CI/CD (GitHub Actions), Firebase
- **Others:** WebAR (8th Wall, WebRTC), Sanity headless CMS, Git, Postman, Agile/Scrum, AI-assisted development (Claude, Gemini)

Work Experience

Full Stack Developer (Contract) *December 2025 – September 2026*

NUvibe, Sydney, Australia (Remote)

- Delivered 4+ responsive web applications for healthcare, fitness and e-commerce clients in React.js, Next.js and TypeScript, shipping through Git pull-request code reviews and GitHub Actions CI/CD.
- Lifted user dwell time by 40% across 3 live installations by building a production WebAR platform with 8th Wall and WebRTC that serves AI-animated content from image triggers.
- Cut average page load times by 30% and held Lighthouse scores above 90 by optimising TypeScript front ends built with Vite and Tailwind CSS, including technical SEO fixes.
- Sped up content publishing cycles by 50% by integrating Sanity headless CMS through REST APIs, so non-technical stakeholders manage content without developer support.

Full Stack Developer *July 2021 – October 2023*

WV Automation, Hyderabad, India

- Shipped 8+ MERN stack projects for platforms serving 500+ daily users by delivering features in Agile sprints alongside a cross-functional team.
- Cut API response times by 25% and improved data retrieval efficiency by 35% by re-architecting a monolithic Node.js backend into modular services with documented REST APIs, tuning database queries, adding caching, and removing ~3,000 lines of dead code.
- Reduced page load times by 40% by rebuilding the front end around a library of reusable React components.
- Shortened onboarding for new developers by 20% by mentoring through pair programming, code reviews, and written documentation.

Education

Master of Information Technology *February 2024 – December 2025*

Monash University, Melbourne, Australia

- WAM 74.75 (Distinction). Capstone: Hikewise (see Projects).

Bachelor of Technology – Electrical and Electronics Engineering *August 2016 – June 2020*

Manipal Institute of Technology, Manipal, India

Projects

Hikewise – Bushfire Recovery and Trail Visualisation Platform | Monash University

- Built the full-stack platform with React, Django, PostgreSQL/PostGIS and AWS, adding spatial analytics for trail and fire intersections that cut map load time by 60%.
- Deployed to AWS EC2 and S3 with CI/CD through GitHub Actions and integrated PlantNet AI for real-time species identification (95% accuracy).
- Shared planning and timelines in a cross-functional team spanning business, IT, data science and cybersecurity; sourced 500+ trail records through outreach with Parks Victoria, documented the platform and presented outcomes to industry sponsors.

BirdTag – Serverless Media Storage and Tagging System | Monash University

- Built the React front end for a serverless pipeline on AWS S3, Lambda and DynamoDB supporting 100+ concurrent users; tag-based indexing cut query latency by 60% versus a flat-file approach.
- Coordinated deliverables across a 4-person team, keeping documentation and technical requirements on schedule.

SpiritWell – Mental Wellness Web Application | Monash University

- Sole developer of a Vue.js, Firestore and Google Gemini app with mood tracking, AI coaching and crisis detection, reaching 98% WCAG 2.1 accessibility compliance.

Certifications

- Introduction to Agent Skills, Anthropic Academy, 2026
- Model Context Protocol: Advanced Topics, Anthropic Academy, 2026
- AWS Certified Developer - Associate, in progress, expected November 2026

Awards and Leadership

- Best Project Winner, Monash PG Industry Experience Expo S2 2025.
- Event Management Head, MIT Sports Club; Graphic Design Head, IE-E&E Students' Chapter (branding for 400+ students).
